WORK EXPERIENCE

UI SOFTWARE ENGINEER

COGNIZANT TECHNOLOGY SOLUTIONS

📅 2022 - current   📍 BANGALORE , KARNATAKA

This is next generation railway infrastructure website which is built for section managers and the admins who are going to control the delivery of assets. Currently working on migration of existing project/functionalites from plain old javascript/html/css to React/redux

The application has 2 different flows for section managers and admins to manage assets.

Technologies Used: JavaScript (React / React Hooks/ Redux, JEST and react testing library), webpack, HTML, CSS.

Key Responsibilities:

- Working on creating components using React, Redux etc.
- Working on UI dashboard components and modules using charting libraries like High Charts/google charts/ goJs etc.
- Working with product owners for backlog grooming.
- Unit testing of UI components using JEST and react testing libraries.
- Manual testing of work.
- Collaborating with QA team . Explain them on design and functionalities.
- Actively involved on bug fixing and testcase writing.
- Delivered 6 sprint release, meeting aggressive deadlines for customer.

PERSONAL PROJECTS

Candidate Manager

- Created a react based.application which uses CRUD operations stores the personal details of Candidtes . User can edit and delete the records from the list of candidtes displayed. Used Json-server , a fake rest api to store information of candidates in the form of json.

Weather App

- Created a weather app using react where user can enter the city name in the search bar and then on clicking on the search button, it gets us the weather details of that place.

TECHNICAL SKILLS

- HTML
- CSS
- Javascript
- React
- Agile
- Redux
